

POSITION: THERAPY DEVELOPMENT MANAGER

STAFF REQUISITION NOS.:

SR-22-024 (ARKANSAS)

SR-22-027 (OHIO)

SR-22-028 (NEW JERSEY)

SR-22-029 (FLORIDA)

OVERALL RESPONSIBILITIES:

Therapy Development Manager serves as a primary resource for account/office management and support for Angel Medical System products. The Therapy Development Manager will supervise and coordinate clinical and sales support activities necessary and provide technical support to end users (physicians & nurses) on AngelMed products.

KEY AREAS OF RESPONSIBILITY:

- Provide training and technical support to end users (physicians, nurses, patients, other health care personnel) on AngelMed products.
- Attend clinical cases and provide technical support on product programming and implantation techniques.
- Work closely with the physician and staff on the education of the Guardian
- Work closely with the physician and staff to identify patients for the Guardian
- Work with the physician to educate the patients of the Guardian
- Perform troubleshooting on AngelMed products.
- Responsible for ensuring proper programming of AngelMed devices.
- Facilitate the conduct of clinical trials by working with clinical investigators and AngelMed clinical and regulatory personnel in a professional and ethical manner.
- Help ensure patient safety to the maximum extent possible by adhering to all applicable regulations, standards and requirements related to clinical studies, patient confidentiality, etc.
- Provide detailed feedback for product improvement for existing products.
- Perform detailed reporting of product problems and assist sites with returns, replacements, etc.
- Provide input into the product development process for future products.
- Support in-house personnel (engineering, clinical, manufacturing, and regulatory, etc.) as requested to achieve company goals.
- Represent the company in a professional manner at all times.
- Be available via cell phone at all times (nights and weekends included) except when on vacation or at other times when alternate coverage has been arranged.
- On-call duties may be required 24 hours a day, 7 days per week.
- Support other company activities as requested
- Must have a valid driver's license.

QUALIFICATIONS:

- In order to be successful in this position, the candidate must have excellent communication skills and the ability to interface well with physicians, nurses and other site personnel.
- This position will require intimate knowledge of our product's algorithm and programmer operations; thus, the candidate for this position must have strong computer and software knowledge/experience.
- Prior experience with electrophysiology products, IKG's or electrograms is preferred.

EXPERIENCE REQUIRED:

- Bachelor's degree plus 5-8 years of related work experience with a good understanding of specified functional area, or an equivalent combination of education and work experience.
- BS Degree in Biomedical Engineering is preferred
- Experience in implantable electrophysiology products is preferred
